

Background

10/9/03

To: Whom it may Concern

My Name is Sharlene Shaw
my Address 8005 So Elberhart
Chicago IL 60619, How I came
up with the idea for the Int
tee-N-Bibs is back in February
2003. I was holding my little
Nephew, who was born on
January 6, 2003 who was only
1 month old at the time, I was
sitting at my living room window
looking out holding the baby, when
God gave me the idea, the baby
was asleep in my arms, he was
wearing a standard bibs that
tie around his neck, and I wanted
to take the bib off of him, without
moving him or waking him up, I
have call invent-tech, with this
idea and have spoken to Mrs.
Molly Toel on a number of time
since February. I am just
sending some of the thing that
they sent me, so if they have
already tried to have this idea
patent they are not being truthfull.
Some of this is what I actual sent
invent-tech on there paper. at the
time when I call invent-tech, I did

10/9/23

not know that I could have
this idea Patent on my own
but after alot of research, and
a number of trips to the Library
with books, and the use of
the internet, I was able to
find out how I could obtain
a patent from the U.S. patent
on my own, I think I call
every department with the U.S.
patent, I really want to thank
everyone there for helping me
so patiently on the phone.

of summary

7/2/03

This unique idea was created for babies that drool a lot and have digestion problems which cause some babies to spit-up frequently. Making the babies clothing wet, or have the parent/care giver to change your baby's clothes and/or keep having to work with the standard bibs of making the babies head and neck backward and forwards, making babies more fussy, or wakening the baby from his or her sleep. This unique design will allow you to change your baby's bibs when it becomes wet and messy, more easier and comfortable for babies, and their parents. Also the 2-in-1 tee-N-bibs can help parent with small children and infant with disability.
